

HAMILTON
CASEWORK SOLUTIONS

THE
Workplace
Transformation

2025

The workplace is evolving. Traditional office layouts focused on individual productivity are giving way to dynamic, flexible environments that prioritize collaboration, adaptability, and employee experience. Hamilton Casework Solutions provides tailored storage and organizational systems that anchor these changes, delivering the physical infrastructure businesses need to support modern workflows.

Our solutions combine smart design, flexible configurations, and seamless integrations to create workspaces that inspire productivity while enhancing functionality and organization.

The Changing Nature of Work

HYBRID WORK AND FLEXIBILITY

Work no longer happens in one fixed location. Employees split their time between home, office, and third spaces such as coworking hubs and cafes. This shift demands workplaces that support a blend of focused work and collaboration while enabling employees to move seamlessly between tasks.

The workplace is no longer confined to a single location. Employees seamlessly transition between working from home, offices, and shared spaces. This new dynamic requires spaces that accommodate diverse workflows, support focused tasks, and enable collaboration.

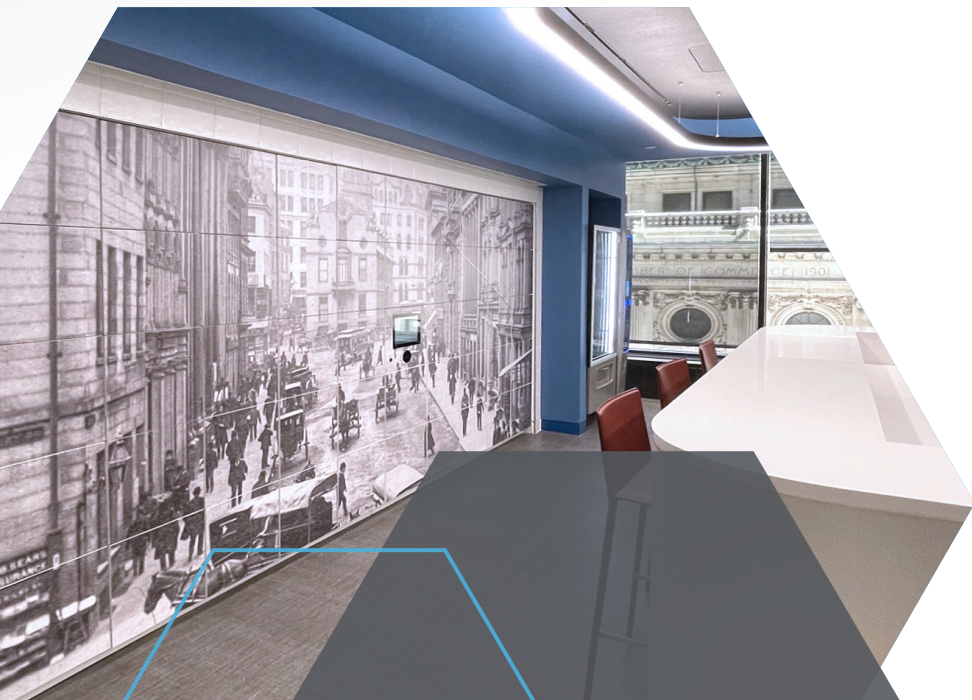

The Challenges Businesses Face

Flexible Workflows - Supporting employees who need adaptable spaces for both independent and team-based tasks.

Space Optimization - Balancing open areas for collaboration with private zones for concentration.

Security and Organization - Offering secure storage that meets the needs of hybrid schedules and shared workspaces.

Employee Experience - Designing environments that foster engagement, comfort, and productivity.

HOW HAMILTON ADDRESSES THESE CHALLENGES

HAMILTON provides modular, adaptable storage solutions that help businesses create organized, efficient spaces. Our designs prioritize usability, aesthetics, and scalability, ensuring that workplaces evolve alongside employee needs.

The Role of Data in Workplace Design

DATA-DRIVEN DECISIONS

As offices embrace smart technologies, data plays a crucial role in optimizing layouts, tracking usage patterns, and improving resource allocation. Businesses leverage analytics to make informed decisions about space planning and storage configurations.

SUPPORTING TECHNOLOGY INTEGRATION

While HAMILTON doesn't manufacture technology, our storage solutions integrate seamlessly with smart locks, occupancy sensors, charging connections and workplace analytics platforms. This allows businesses to monitor locker usage, analyze trends, provide convenience to their employees, and optimize layouts without compromising on design.

Smart Lockers as the Future of Work

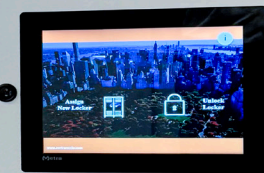

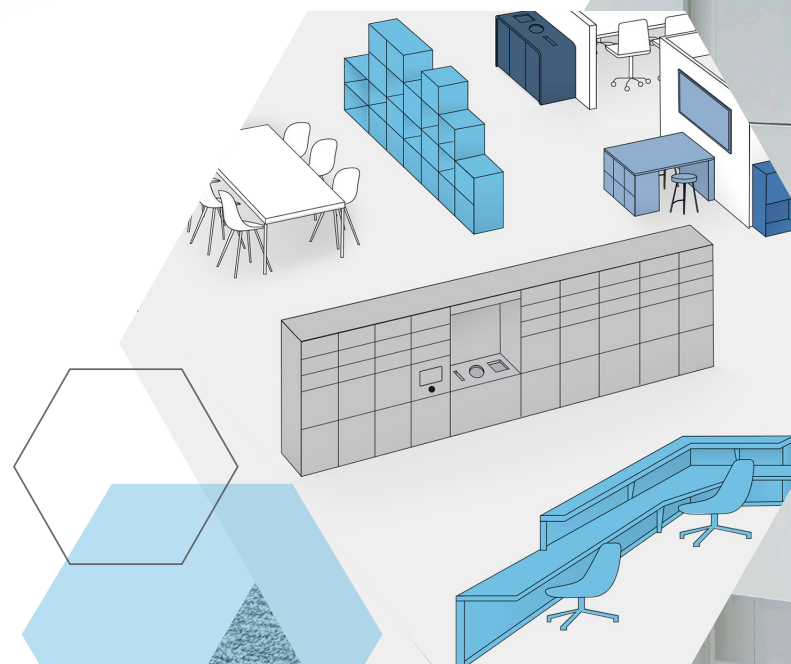

MEETING MODERN WORKPLACE NEEDS

Smart lockers are no longer just storage solutions—they have become critical tools for supporting flexible work environments. With reduced desk assignments and more shared spaces, lockers offer:

Personal Security - Safe, dedicated storage for employees' belongings.

Operational Efficiency - Organized, clutter-free environments that streamline workflows.

Scalable Designs - Configurations that adapt as business needs evolve.

Features and Benefits of Smart Lockers

FRICITIONLESS EXPERIENCE

HAMILTON lockers provide seamless, intuitive user interactions. Employees can reserve lockers remotely, access them instantly, and customize their storage options based on daily needs. With mobile app integrations and RFID capabilities, lockers support hybrid work environments where flexibility is key.

SECURITY AND A PIECE OF MIND

Smart lockers ensure secure storage for personal and professional belongings. Integrated lock systems, including RFID badges and mobile credentials, enhance security while maintaining ease of access. Administrators can track usage and access logs to maintain compliance and accountability.

SCALABLE AND FLEXIBLE CONFIGURATIONS

Designed to grow with your business, HAMILTON lockers offer modular configurations that adapt as needs evolve. Whether reconfiguring layouts or expanding locker banks, businesses can scale seamlessly without replacing existing systems.

DATA INSIGHTS AND ANALYTICS

Gain actionable insights into locker usage to make data-driven decisions about space optimization. Reporting features track:

Utilization rates by location or team.

High-demand lockers and peak usage times.

Reservation trends for future planning.

AESTHETIC AND FUNCTIONAL CUSTOMIZATION

HAMILTON lockers are designed to complement modern office aesthetics while maximizing functionality. Customization options include:

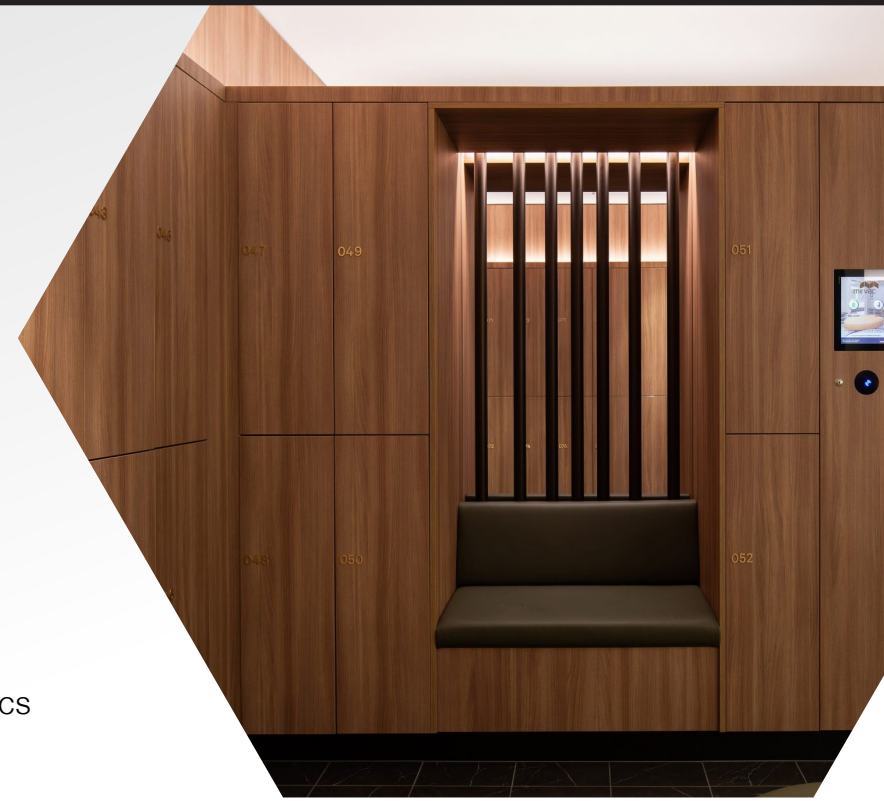

Materials - Laminates, textured finishes and solid-surface to match branding.

Design Features - Writable surfaces, graphics, and biophilic enhancements.

Internal Accessories - USB ports, shelves, caddies, and compartments for added usability.

ADAPTABILITY TO HYBRID WORK MODELS

With more shared workspaces and fewer assigned desks, HAMILTON lockers support flexible work arrangements by providing employees with secure, personal storage. This adaptability encourages a clutter-free, organized environment and improves workplace satisfaction.

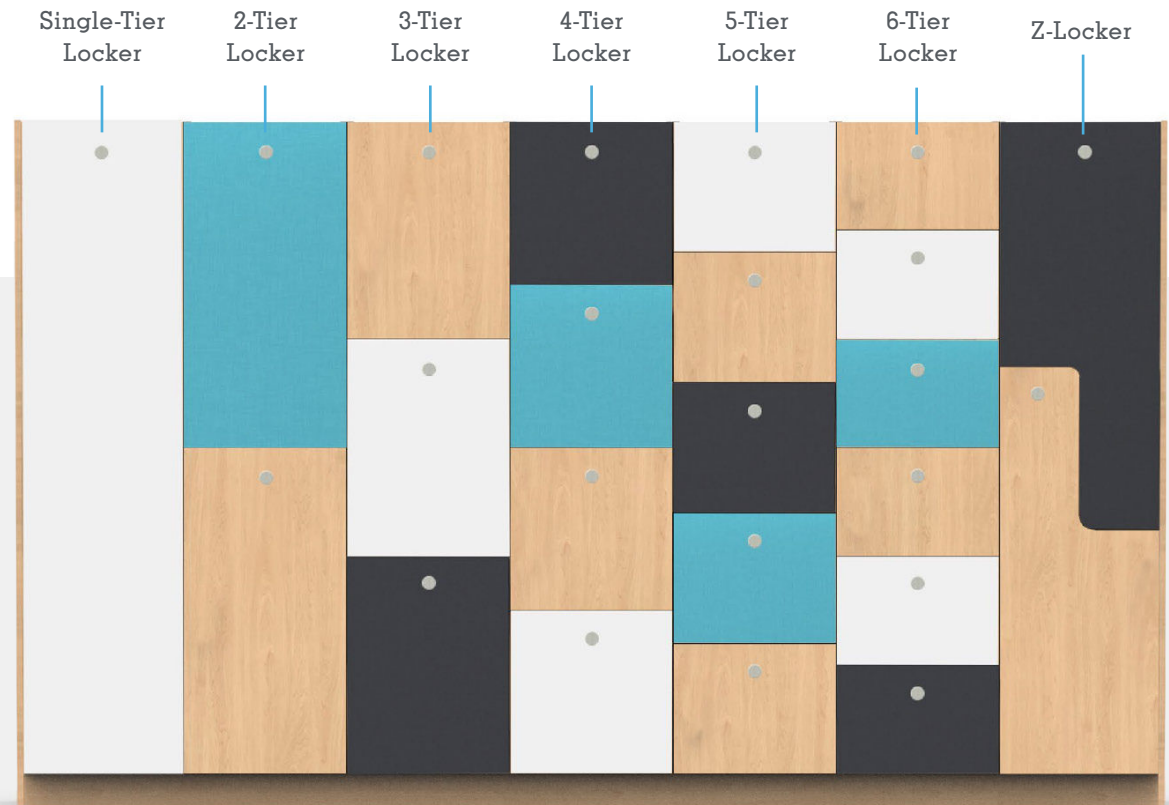

Designing from the Inside Out

Our thoughtfully designed wide-range of standard locker sizes allow for you to design a custom configuration that meets the needs of your space and employees. From the sizes and dimensions, to the orientation of the lockers, to materials used, to the lock and desired user experience, to even the inside of the locker — we have it covered.

Standard Locker Sizes & Configurations

STANDARD SIZES

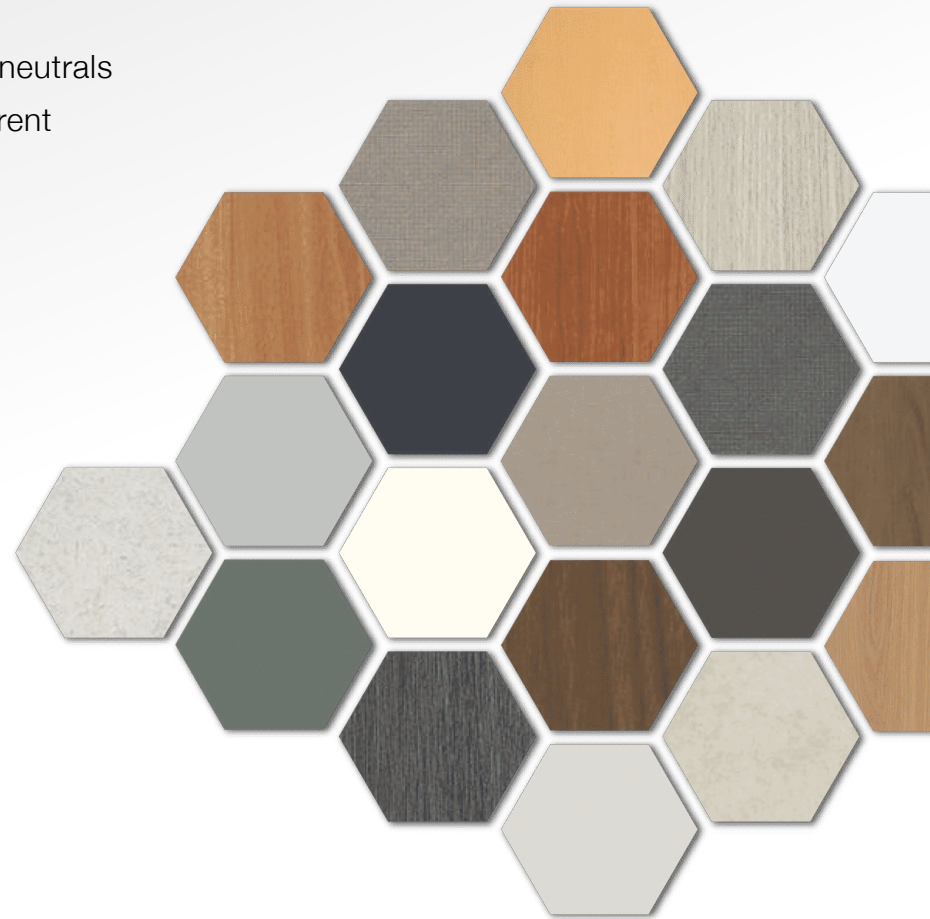

Custom sizes available

WIDTH	DEPTH	HEIGHT
12"	15"	36"
15"	18"	40"
18"	20"	54"
		68"
		72"
		90"

36" height not available for 5-Tier Locker, 6-Tier Locker and Z-Locker. 40" height not available for 6-Tier Locker and Z-locker.

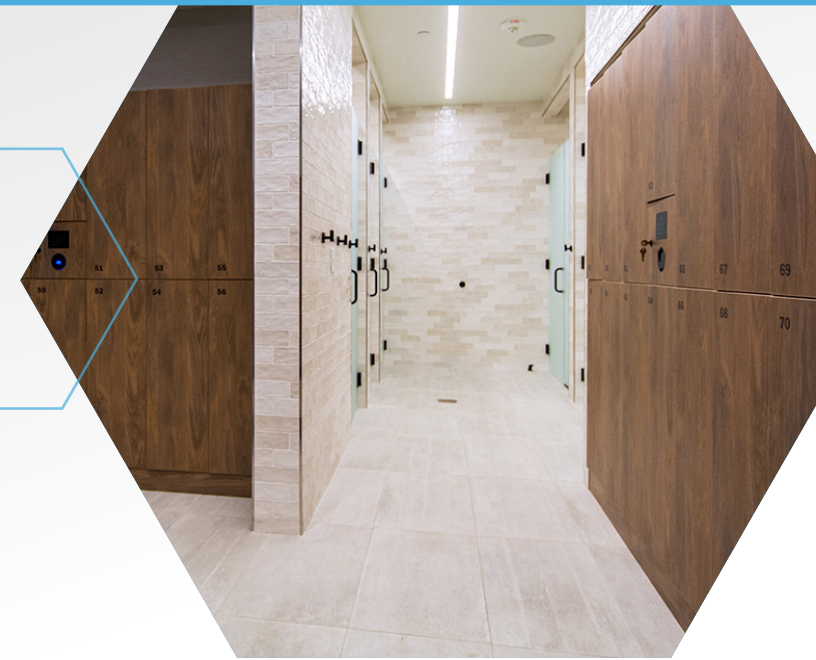

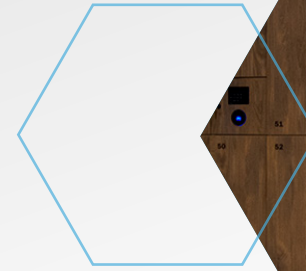

Locker Laminates & Materials

Our recently updated palette of laminate colors aligns with common neutrals that fit in almost any environment, versatile woodgrains featuring current trends and fitting scale, and accent patterns of tonal textures.

LOOKING FOR MORE?

You are not limited by our standards — if you are looking for something that is less common we have a wide variety of options to work with from different laminate manufacturers.

Inside a Locker

There's so much more to a locker than just the exterior – and when it comes to user experience, it's the little details that count. A well-designed space is one that caters to the known and unknown needs of the people using it. The same goes for lockers. A coat hook is more than just a hook. It is the first step of coming into the office and settling in for the day. Every day, each person has a small, invisible routine when placing their belongings into their locker. Make their experience more seamless, and more intuitive with thoughtful interior design inside the locker.

STORAGE CADDY

Perfect for pens, phones, or any other small handheld that you need at your disposal.

WALL HOOKS

Double-winged hooks for hanging bags and purses.

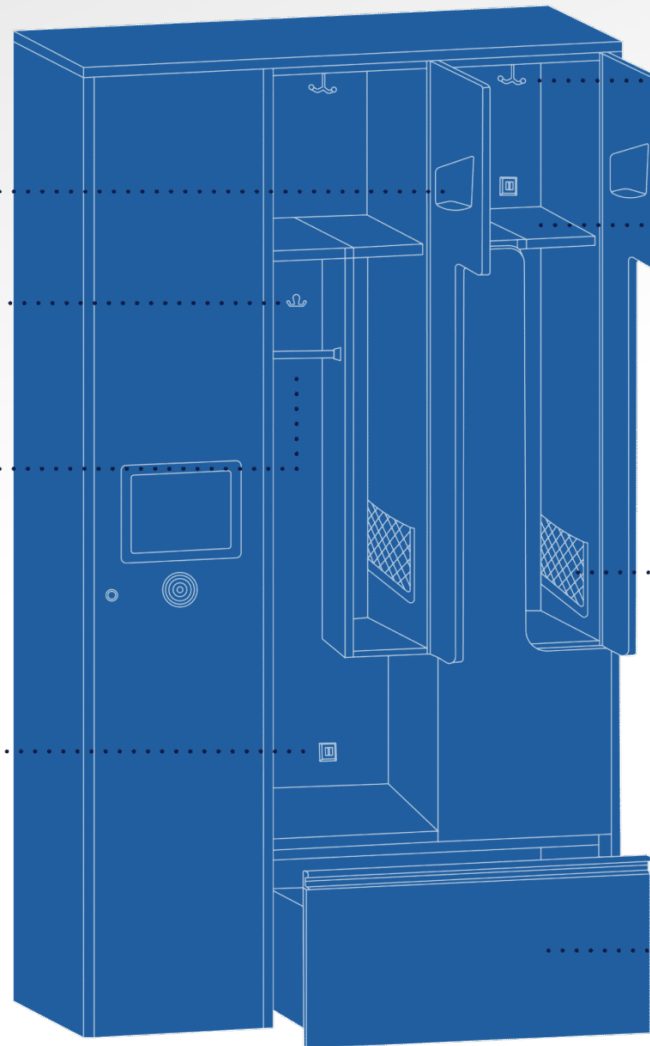

HANGER ROD

Hooks to hang your work clothes while you head to the gym.

USB OUTLET

Fully equipped with USB powerpoints to ensure your phone never dies at work again.

DOUBLE-WINGED HOOK

Double-winged hooks — are perfect for hats and scarves in the winter.

COLLAPSIBLE SHELF

A full shelf when you need it and a full-length opening when you need to hang coats for the winter.

NETTING STORAGE POUCH

Just like on airplanes, a net is perfect for those small and mid-sized electronics.

BOTTOM DRAWER STORAGE

A place to store your shoes or bulky items that you don't want soiling your other personal belongings.

Locks For a Tailored User-Experience

When it comes to storage, the actual locker is only part of the solution — the lock and technology options make up the other half. Whether you're looking for a standard no-fuss lock to keep belongings safe, or a more tech-driven lock system that integrates with other aspects of your building, we've got an option to fit your application and needs.

The Evolution of Locks

The way we secure and access storage has evolved to match the needs of modern workplaces. HAMILTON offers a range of lock options designed to support flexibility, security, and seamless integration with today's technologies. From fully networked systems to low-tech mechanical solutions, HAMILTON provides options for every use case.

4-296

SMART NETWORKED (WIRED) LOCKS

Wired smart locks offer the highest level of connectivity and control. Can be integrated directly into building management systems, these locks provide:

Real-Time Monitoring - Track usage and access instantly.

Centralized Management - Administer and reconfigure remotely without manual adjustments.

Enhanced Security - Use RFID cards, mobile credentials, or biometrics for secure access.

Scalability - Ideal for larger installations needing enterprise-level functionality.

SMART BATTERY (WIRELESS) LOCKS

Wireless locks combine flexibility and technology without requiring hardwiring, making them easy to retrofit.

Features include:

Mobile and RFID Access - Unlock lockers using smartphones or badges.

Remote Programming - Configure and update settings through cloud-based platforms.

Flexible Installations - Perfect for offices needing quick implementation and scalable growth.

BATTERY LOCKS

A reliable option for standalone installations, battery-operated locks deliver simplicity and efficiency. They provide:

Digital Keypads - Use PIN codes for quick access.

Low-Maintenance Design - Long battery life reduces replacements and upkeep.

Cost-Effective Security - Ideal for businesses requiring secure yet affordable storage.

MECHANICAL LOCKS

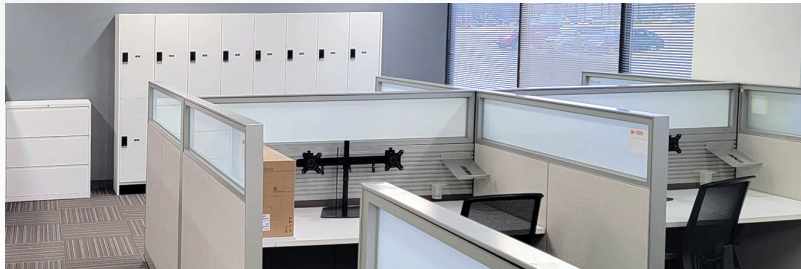

For spaces where technology is not required, mechanical locks offer simplicity and durability.

These locks are:

Manually Operated - No power or batteries needed.

Highly Reliable - Perfect for areas where electronic systems may not be practical.

Budget-Friendly - Provide essential security without added complexity.

BATTERYLESS LOCKS

Our newest addition, batteryless locks, combines innovation with sustainability. Powered by kinetic or electromagnetic energy, these locks are:

Eco-Friendly - Eliminate the need for batteries, reducing waste.

Self-Powered - Generate energy through physical motion, ensuring reliability.

Minimal Maintenance - No battery replacements required, lowering operational costs.

Modern Workplace Design and Configurations

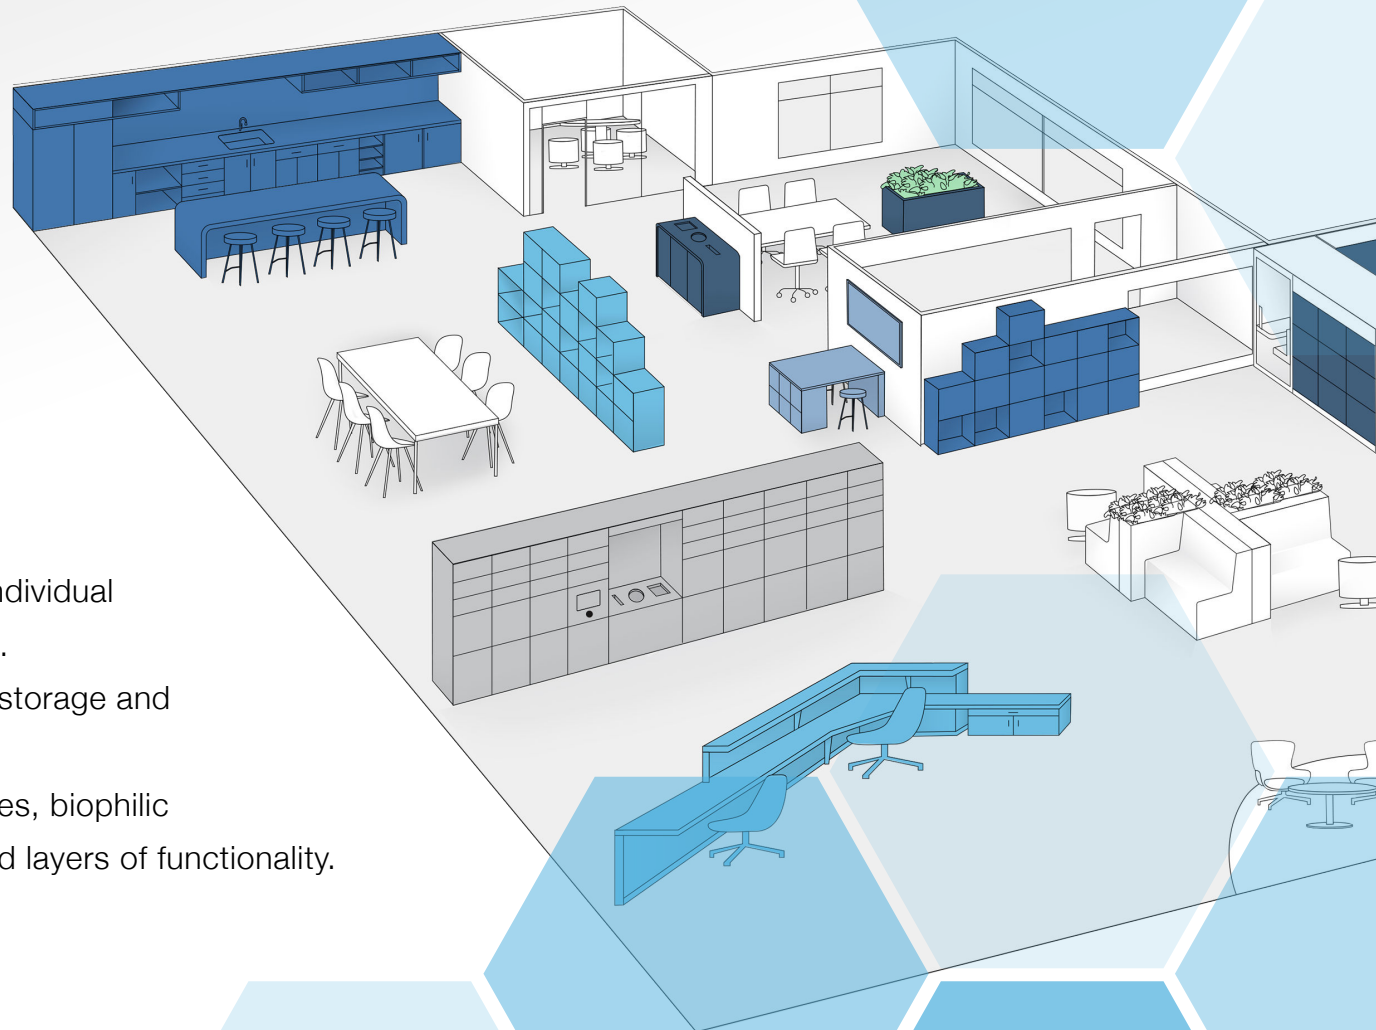

FLEXIBLE AND MODULAR LOCKER DESIGN

HAMILTON lockers are designed to support modern, flexible workspaces. Our modular approach allows businesses to configure locker systems based on current needs and easily adapt to future changes. This scalability makes it possible to create solutions for:

Personal Storage Zones - Secure, individual spaces for hybrid and mobile workers.

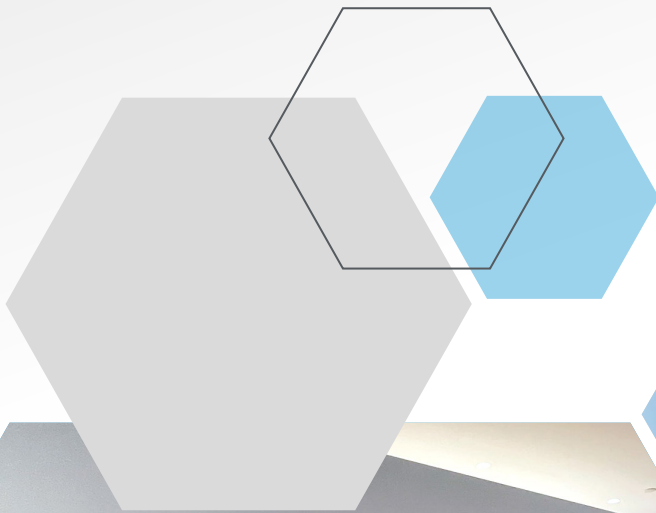

Team Collaboration Areas - Shared storage and tools that promote teamwork.

Multi-Use Features - Writable surfaces, biophilic elements, and embedded displays add layers of functionality.

Dynamic Spaces: Beyond Traditional Boundaries

Today's workplace design has evolved past static open offices to fluid, purpose-driven environments. Modern workspaces require thoughtful space division that maintains openness while creating distinct zones for different work modes and team needs.

SMART ZONE SOLUTIONS

Our zone dividers transform traditional space separation into dynamic workplace tools. These modular solutions adapt to your team's evolving needs while maintaining the open, collaborative atmosphere essential to modern work.

Each zone divider is a multifunctional hub that integrates:

Smart storage for hybrid workers

Integrated media displays for collaboration

Biophilic elements for wellbeing

Acoustic management features

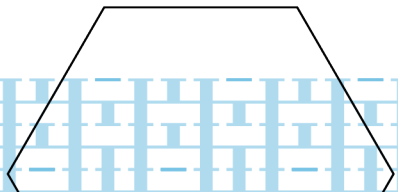

Interactive surfaces for spontaneous ideation

Light-permeable designs that maintain spatial flow

Technology integration points for hybrid collaboration

Bookended with phone booths for private conversations

By reimagining traditional boundaries, these solutions create intuitive transitions between focus areas, collaboration zones, and social spaces—all while supporting your workplace technology and storage needs.

MULTIPLE LOCKER SIZES WITHIN A SINGLE BANK

Modern workplaces demand versatility, and HAMILTON delivers with locker banks that incorporate multiple sizes within a single system. This approach accommodates diverse user needs without compromising design or function.

Small Compartments - Ideal for personal items such as phones, and keys.

Medium-Sized Lockers - Perfect for day-use storage, including bags, shoes, and work materials.

Large Compartments - Suitable for bulkier items like gym bags, coats, and equipment.

Custom Combinations - Mix and match sizes to create tailored layouts that maximize space utilization.

Flexible Use Cases - Supports both assigned and unassigned locker configurations to meet evolving workplace demands.

COLLABORATIVE ISLANDS AND STORAGE SOLUTIONS

In today's fluid workplace, collaborative islands serve as anchor points for spontaneous innovation and team connection. These multifunctional hubs transform open office layouts into dynamic environments that support various work modes and team sizes.

PURPOSEFUL FLEXIBILITY Islands serve multiple workplace needs:

Quick stand-up meetings

Individual focus work

Small group collaboration

Digital-physical hybrid sessions

Social connection points

Temporary touchdown spaces

By strategically placing these intelligent hubs throughout your space, you create natural gathering points that encourage movement, foster creativity, and support the fluid nature of modern work—all while maintaining order through smart storage integration.

BUILT-IN WALLS

We often think of a locker being built-in the wall or against a wall as just that. But why not incorporate additional functionality and added convenience? Similar to wall partitions, a smart locker wall can provide the convenience of personal storage for belongings, but also:

Designed to incorporate media displays for collaboration and presentations

Integrate biophilia into the design

Consist of writable surfaces for collaboration, like whiteboard laminate

Incorporate tack board or sound dampening material

Bookended with phone booths for private conversations

Designed to incorporate alternative locker door materials or a vinyl wrap

Incorporate trash and recycling receptacles

Design with integrated seating units or storage cabinets

FEATURED:

COLLABORATION ZONE

With practically endless configurations create a collaboration or work zone that meets your specific and unique needs.

This modular casework wall was specifically created for a 'design center' purpose to hold samples of fabrics, color chips, and more, but the modularity of its design allows for certain features such as the sliding trays or shelves to be instead designed with media displays or lockers. Dividing space in the office with collaboration zone units contributes to your activity-based work model.

Sliding panels add additional functionality for collaboration and brainstorming. Picture shows tackboard and whiteboard. Customize to all of one or the other, or even include chalkboard panels.

This Design Center contains 3" tall trays for storage of fabrics and other sample materials sitting on shelves and 4" drawers with pulls.

Easily slide the panels together or separate to reveal different types of storage and functionality of the wall unit.

The center of the unit could serve as a media display to present presentations or have a virtual and in-person meeting. Or all storage with more trays, drawers, shelving, lockers or cabinets.

Design the unit to meet your unique needs, your unit could be designed to house:

- Trays and drawers of various sizes**
- Shelving**
- Lockers for personal belongings**
- Cabinets and doors**
- Pegboard**
- And more**

Built-in shelving units serve as the perfect size to store larger items.

INTEGRATED WASTE SOLUTIONS FOR THE MODERN WORKPLACE

In today's sustainably-focused offices, waste management isn't an afterthought—it's an integral part of workplace design. Modern spaces demand receptacles that balance function with aesthetics while supporting corporate ESG initiatives and employee wellness goals.

Our integrated waste solutions go beyond traditional bins. They're thoughtfully designed elements that:

Seamlessly blend into collaboration zones and quiet spaces

Support proper waste sorting with intuitive design

Feature antimicrobial surfaces for enhanced hygiene

Integrate with smart sensors for efficient maintenance

DESIGN APPROACH

We craft our receptacles to complement contemporary workplace aesthetics—from sleek waterfall countertops to biophilic installations. Each design considers the space's purpose, traffic patterns, and cleaning protocols. Using non-porous, commercial-grade materials, our solutions maintain their appearance while standing up to constant use.

Today's high-performing workplaces aren't just about technology and flexibility—they're about creating environments that enhance human connection and wellbeing. Biophilia isn't a trend; it's a core element of workplace strategy that delivers measurable results in employee satisfaction, cognitive function, and stress reduction.

REIMAGINING STORAGE WITH NATURAL ELEMENTS

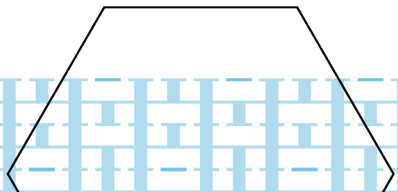

We've transformed traditional storage solutions into multifunctional design elements that seamlessly integrate nature into the workplace. Our innovative approach combines smart storage with biophilic elements to create:

Storage solutions with integrated planters

Nature-inspired materials and textures

Sustainable, wellness-focused environments

By merging functionality with biophilic design, we help create workspaces that don't just store—they nurture, inspire, and contribute to your organization's wellbeing goals while strengthening your workplace brand story.

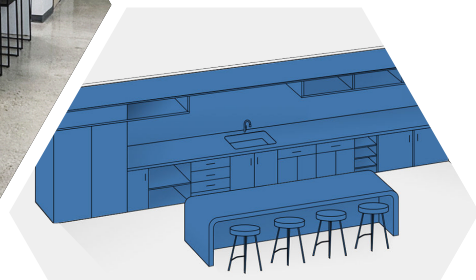

MODERN WORKPLACE CAFES

The workplace cafe has evolved from a simple break room into the heart of office culture—a vital space where spontaneous connections spark innovation and strengthen team bonds. In today's hybrid environment, these spaces serve as magnetic destinations that draw people to the office.

DESIGNING FOR COMMUNITY Modern workplace cafes blend hospitality-inspired design with practical workspace elements to create dynamic social hubs. Our solutions help you create:

- Flexible zones that transition from dining to collaboration**
- Smart storage integration for personal items and supplies**
- Sustainable waste management solutions**
- Technology-enabled spaces for hybrid team gatherings**

By thoughtfully designing these spaces with premium materials and intelligent storage solutions, your cafe becomes more than a lunch spot—it becomes a catalyst for workplace culture and collaboration.

From Traditional Mailrooms to Smart Exchange Lockers

EXCHANGE OF GOODS LOCKERS

The name of the game is convenience and experience. Exchange of goods lockers give employees an added convenience of not having to wait in line or unnecessary interactions and interruptions throughout the day.

This amenity is great for exchanging expensive items or sensitive items because it is all auditable. Meaning in the smart locker software it is possible to see who opened what locker and when.

MAILROOM SORTER DESIGN

Hand-pick surfaces, finishes and cabinets to match the look and feel of your existing office space. Today, mailrooms are integrated into prominent office areas instead of an afterthought in the basement. They could be located by the reception desk for employee and delivery convenience or by the agile pantry with integrated soffits and coffee dispensers for a multipurpose space that doubles as a social hub.

Our manufactured case goods include a complete line of sort and freestanding sort modules with open and closed back sorters including plexiglass-backed. We offer zip code sorters, consoles, overhead units and credenzas. Make your mailroom work for your office with a sleek and modern look while still being functional.

Crafting Memorable First Impressions in the Digital Age

Physical workplace experiences matter more than ever. Every visit to your office—whether by employees, clients, or partners—is an opportunity to reinforce your brand values and culture through thoughtful design and seamless experiences.

DESIGNING FOR IMPACT

The most powerful brand impressions often come from subtle touchpoints throughout the space. From the moment someone enters your office, every interaction should reflect your organization's commitment to innovation, sustainability, and employee experience.

By elevating these everyday touchpoints through thoughtful design and smart technology, you create lasting impressions that reinforce your brand's forward-thinking approach and commitment to exceptional experiences.
